Installation

1.) Before installing, it's best that you have the items below prepared:

- **Domain Name**
- **Web Host**
- **Your web hosting FTP login details.**

2.) To install the script on your server, simply run the application: **digihand.exe** and follow the steps that are provided in the wizard.

You will be asked a series of questions, where you can answer according to your needs of this program.

Upon reaching the final step, you can then use the built in FTP to upload to your site. Enter your details for:

1. **Your FTP server**
2. **Directory:** -IF you are installing the script in the root directory, just enter the root directory for example **/public_html/**

Uploading

1. **Login**
2. **Password**
3. Click the "**Copy Files**" button to initiate the upload.

Copy Files

FTP server: yoursite.com 1 Port: 21

Directory: /public_html/ 2

Login: yourftlogin 3

Password: 4

5 Copy Files

< Back Finish

During FTP upload (Final step) you may encounter a Windows warning prompt that asks you if you would like to Block the FTP access. Simply choose "**Unblock**" to allow ftp upload. You are only required to do this once as Windows will remember your selection for this application.

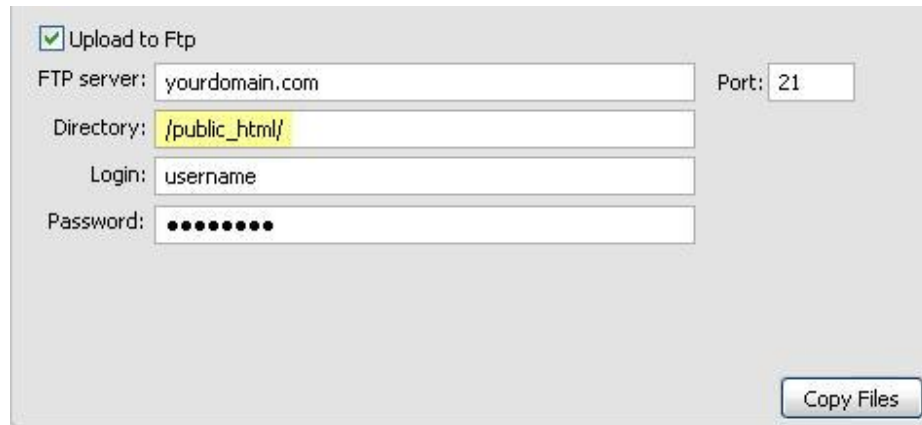

Directory Types

There are three common types of directory or domains for installation. **Choose one** that best suits your needs.

- [Installing into a Top Domain](#) /Root Directory (**Recommended**) Click [here](#) if you are installing it in the root directory meaning that your domain does not share under any other domains. Usually the top domain.
- Installing Into An "[Add On](#)" Domain/Directory With FTP Access
- Installing Into An "[Add On](#)" Domain/Directory **WITHOUT** FTP Access

Installing In Root Directory

-IF you are installing the script in the root directory, just enter the root directory for example **/public_html/**

A screenshot of a web-based FTP upload configuration form. The form is set against a light gray background. At the top left, there is a checked checkbox labeled "Upload to Ftp". Below this, there are four input fields: "FTP server:" with the value "yourdomain.com", "Port:" with the value "21", "Directory:" with the value "/public_html/" (highlighted in yellow), and "Login:" with the value "username". Below the login field is a "Password:" field filled with ten black dots. In the bottom right corner of the form, there is a button labeled "Copy Files".

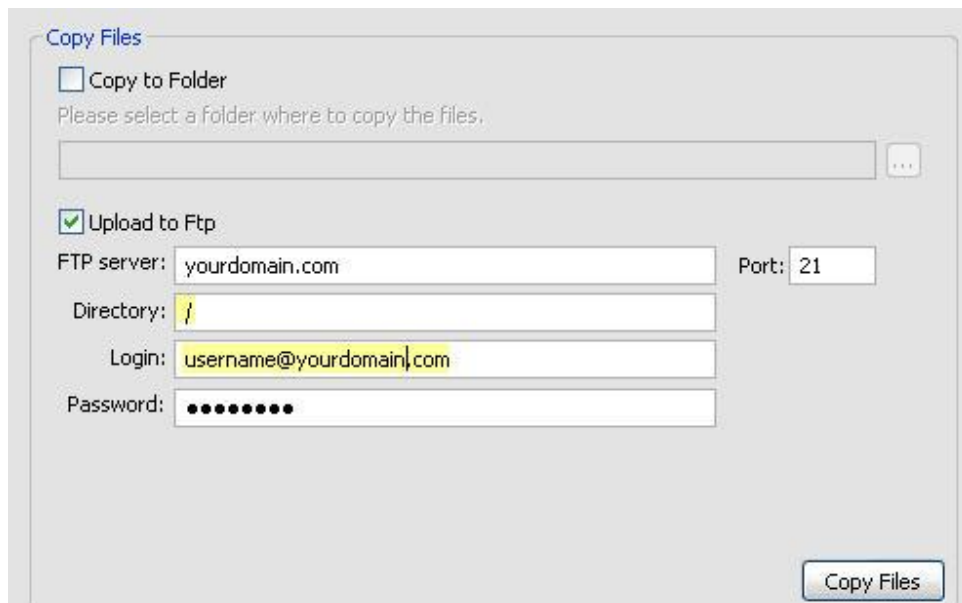

<input checked="" type="checkbox"/> Upload to Ftp	
FTP server:	yourdomain.com
Port:	21
Directory:	/public_html/
Login:	username
Password:	••••••••••
<button>Copy Files</button>	

Installing Into An Add On Domain Directory

Installing The Script Into A Sub-Domains/ Sub-Folders Or Add On Domains

WITH DIRECT FTP Access

-IF you are installing it into a sub-domain or add on domain and you have an **FTP account access for that particular folder only**, then enter it as / and the installer will automatically create a subfolder where the script will be installed.

The screenshot shows a 'Copy Files' dialog box with the following fields and options:

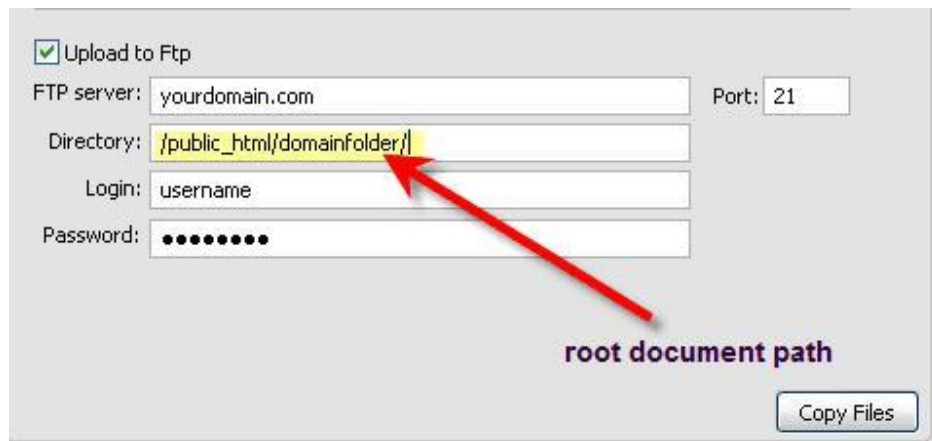

- ☐ Copy to Folder
Please select a folder where to copy the files.
[Empty text box with a browse button '...']
- ☒ Upload to Ftp
- FTP server: [yourdomain.com] Port: [21]
- Directory: [/]
- Login: [username@yourdomain.com]
- Password: [Masked with dots]
- [Copy Files] button

Installing In Sub-Domains/ Sub-Folders Or Add On Domains

Installing The Script In Sub-Domains/ Sub-Folders Or Add On Domains **WITHOUT DIRECT FTP Access**

-IF you are installing the script in a sub-domain or an add on domain that exist within a folder for another root domain and you do not have direct FTP access to that account or an FTP account was not created for that domain, then consult your web host provider on the document root path to the domain you have on their account. In the "Directory Field" enter it as:

/home/yourrootdomainusername/public_html/domainfolder/

The screenshot shows a web form for uploading files to an FTP server. It includes a checkbox for "Upload to Ftp" which is checked. Below this are four input fields: "FTP server:" with the value "yourdomain.com", "Port:" with the value "21", "Directory:" with the value "/public_html/domainfolder/", and "Login:" with the value "username". The "Password:" field is masked with dots. A red arrow points from the text "root document path" below the form to the "Directory:" field. A "Copy Files" button is located at the bottom right of the form.

<input checked="" type="checkbox"/> Upload to Ftp	
FTP server:	yourdomain.com
Port:	21
Directory:	/public_html/domainfolder/
Login:	username
Password:	••••••••
root document path	
<button>Copy Files</button>	

Permission Settings/Chmodding

Once your files have been uploaded, run your browser and go to the installation folder and type in the URL to the chmod.php file:

e.g: <http://yourdomain.com/script/chmod.php>

This will change your permission settings for the template folder to 777 or whatever you have set for your default permission settings in the installer wizard.

After successfully changing the permission, you may safely remove the chmod.php file (for security) by using an FTP software.

Permission Settings Error

After you have uploaded the files to your server, go to:

<http://www.yourdomain.com/script/chmod.php>

This will automatically set the required files and folders to the permission required to run the script correctly

IF your server does not allow you to change the script via chmod.php method, you must change the permission settings manually by using an FTP program.

Chmod the following to write all e.g. 777 **ONLY** if your server returns errors when you run chmod.php.

If no errors found when you run chmod.php just delete it from your server using an FTP program.

ONLY SET THESE FILES AND FOLDER TO "WRITE ALL" PERMISSION IF YOUR WEB HOST DO NOT ALLOW YOU TO USE THE CHMOD.PHP METHOD ABOVE!

Files to set permissions:

ALL files and folders (including ALL files in sub-folders) in:

[/db/ads/](#)

[/db/ads/txtsql](#)

[/db/](#)

[/txtSQLAdmin/](#)

[/upload/](#)

Missing Files Error After Upload

If you find any errors specifying some missing files, then the files might not be uploaded correctly because sometimes due to server timed out settings, the files may not get uploaded correctly. If upload fails or some files do not get uploaded correctly resulting in errors, please use the "Copy Files" function to copy the files to your desktop and use a FTP program to upload the files.

1. Check the "Copy To Folder" checkbox
2. Uncheck the "Upload to Ftp" checkbox
3. Create a folder on your desktop by clicking the browse button
4. Click the "Copy Files" button to initiate the transfer

The screenshot shows a 'Copy Files' dialog box with the following elements and annotations:

- 1. Check here:** A red arrow points to the checked 'Copy to Folder' checkbox.
- 2. UnCheck here:** A red arrow points to the unchecked 'Upload to Ftp' checkbox.
- 3. Browse button:** A red arrow points to the browse button (three dots) next to the folder selection field.
- 4. Click here to intitiate transfer:** A red arrow points to the 'Copy Files' button at the bottom right.

The dialog box contains the following text and fields:

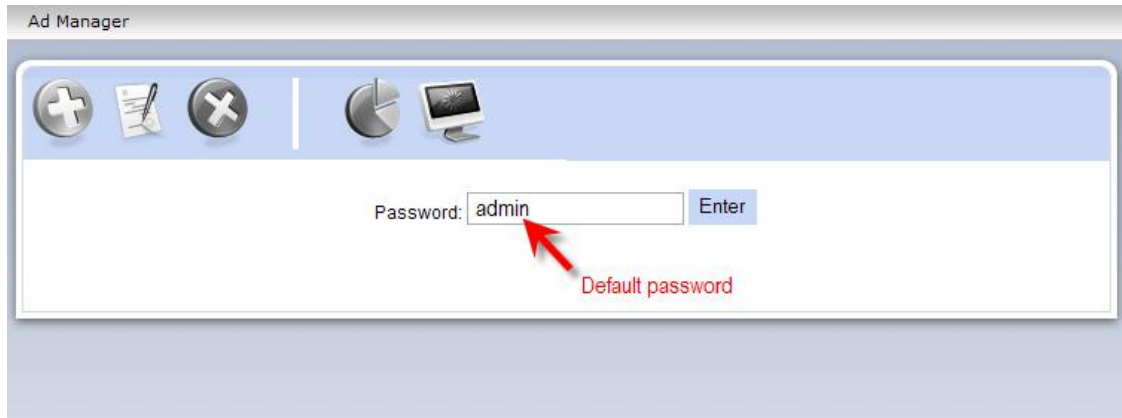

- Title: Copy Files
- Section: Copy to Folder (checked)
- Text: Please select a folder where to copy the files.
- Field: [Empty folder selection field]
- Section: Upload to Ftp (unchecked)
- Fields: FTP server: [Empty], Port: 21
- Fields: Directory: /
- Fields: Login: [Empty]
- Fields: Password: [Empty]
- Buttons: < Back, Finish, Copy Files

Logging Into Your Admin Panel

To login into your admin panel, go to:

<http://yourdomain.com/script/>

Then key in your default password which is:- **admin** into the password field:

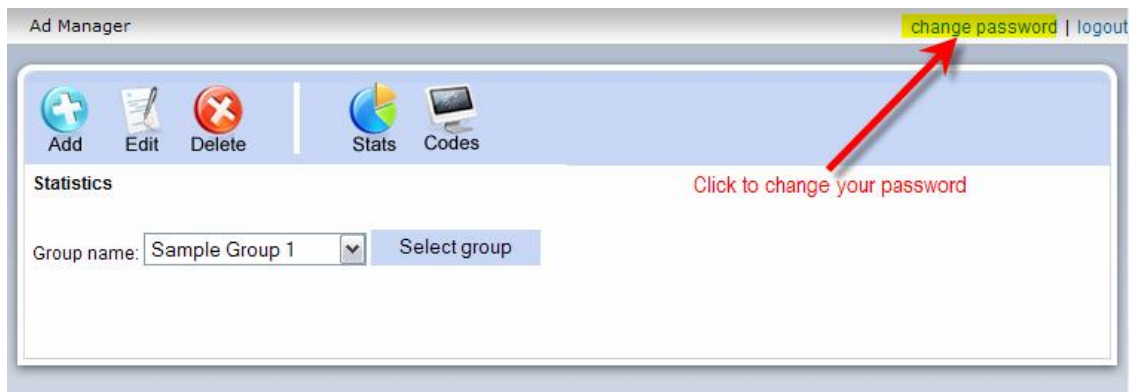

Ad Manager

Password: admin Enter

Default password

After logging in, you can then proceed with changing your login password by clicking the “change password” link at the top right hand corner:

Ad Manager

change password | logout

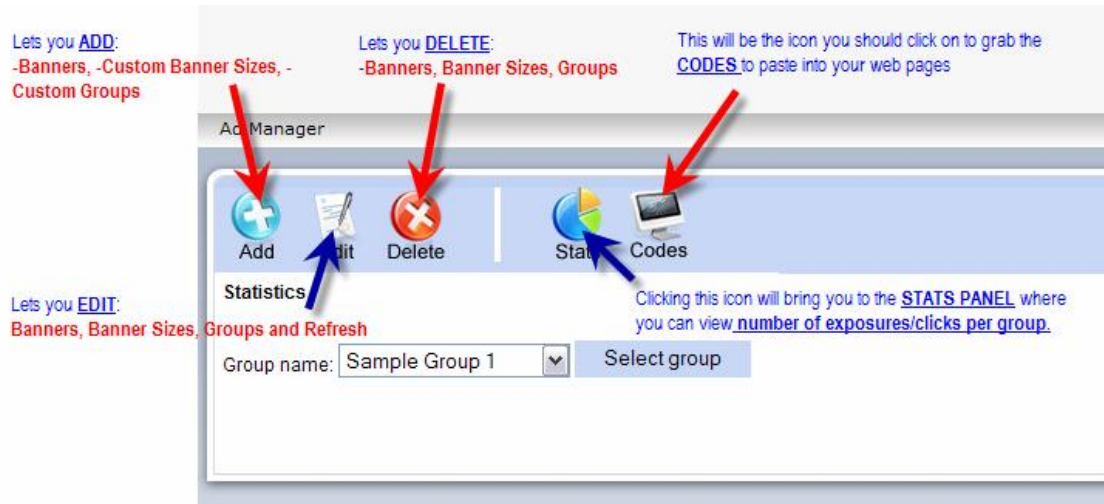

Click to change your password

Statistics

Group name: Sample Group 1 Select group

Admin Panel Sections

Your admin panel is broken down to four sections for ease of understanding with each section accessible through the icon links:

How To Use?

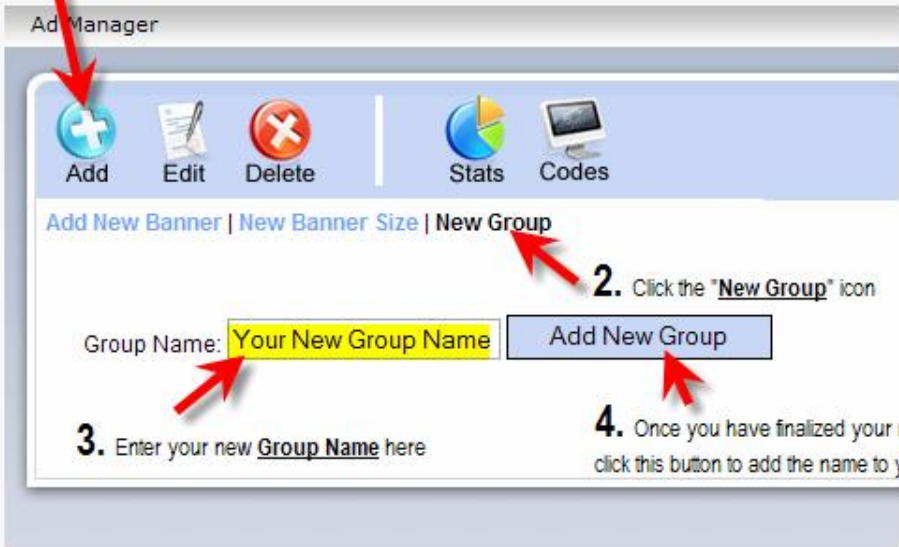

Basically using the script is quite straight forward. You first need to add a new group to your database.

Adding A New Group

A group can be effectively used as a campaign for example. Each group can have different banner sizes (including custom banner sizes).

When, let's say you create a group, then add a banner, **ONLY** the banners with the same size will be rotated or displayed per group. This is to ensure that each ad does serves its position in your template and does not break the layout of your web pages.

1. Click The Add icon

The screenshot shows the 'Ad Manager' interface. At the top, there is a navigation bar with icons for 'Add' (a blue circle with a white plus sign), 'Edit' (a document with a pencil), 'Delete' (a red circle with a white X), 'Stats' (a pie chart), and 'Codes' (a computer monitor). Below the navigation bar, there are three links: 'Add New Banner', 'New Banner Size', and 'New Group'. The 'New Group' link is highlighted with a red arrow. Below the links, there is a form with a label 'Group Name:' followed by a text input field containing 'Your New Group Name'. To the right of the input field is a button labeled 'Add New Group'. A red arrow points to the 'Add' icon in the navigation bar, and another red arrow points to the 'New Group' link. A third red arrow points to the text input field, and a fourth red arrow points to the 'Add New Group' button.

2. Click the "New Group" icon

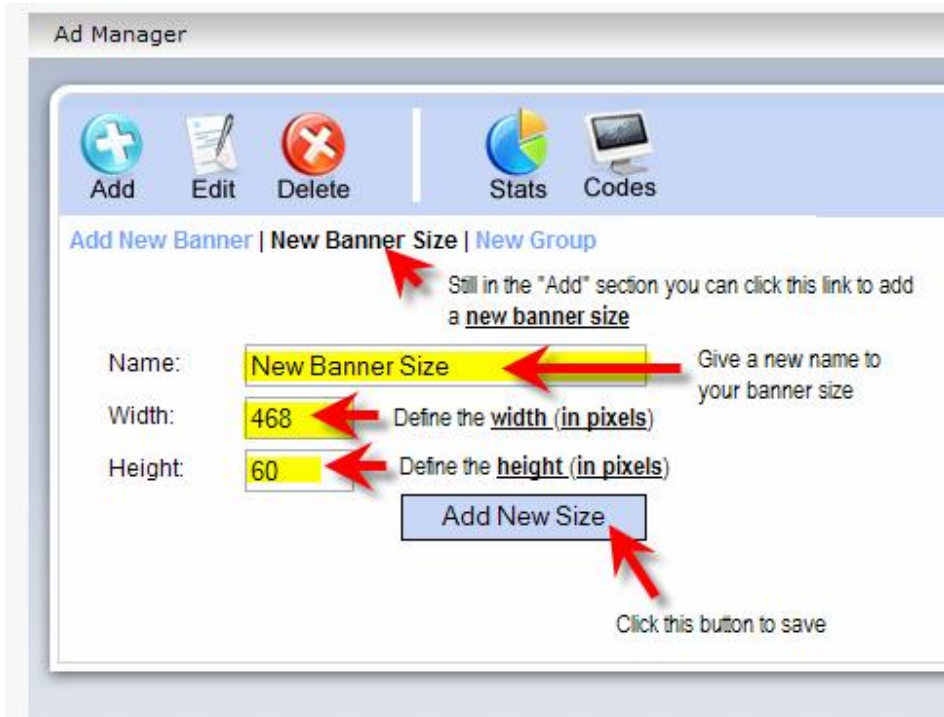

Group Name:

3. Enter your new Group Name here

4. Once you have finalized your new Group Name, click this button to add the name to your database.

Adding A New Banner Size

The script already comes **preloaded with 11 of the most common ad sizes**, but if you would like to add a new custom size, you can do so by following the steps below:

The screenshot shows the 'Ad Manager' interface. At the top, there are icons for 'Add', 'Edit', 'Delete', 'Stats', and 'Codes'. Below these is a navigation bar with links: 'Add New Banner', 'New Banner Size', and 'New Group'. The 'New Banner Size' link is highlighted with a red arrow and a text box that says: 'Still in the "Add" section you can click this link to add a new banner size'. Below the navigation bar, there are three input fields: 'Name:', 'Width:', and 'Height:'. The 'Name:' field contains 'New Banner Size' and is highlighted with a red arrow and a text box that says: 'Give a new name to your banner size'. The 'Width:' field contains '468' and is highlighted with a red arrow and a text box that says: 'Define the width (in pixels)'. The 'Height:' field contains '60' and is highlighted with a red arrow and a text box that says: 'Define the height (in pixels)'. Below these fields is a button labeled 'Add New Size', which is highlighted with a red arrow and a text box that says: 'Click this button to save'.

Ad Manager

Add Edit Delete Stats Codes

[Add New Banner](#) | [New Banner Size](#) | [New Group](#)

Still in the "Add" section you can click this link to add a new banner size

Name: New Banner Size Give a new name to your banner size

Width: 468 Define the width (in pixels)

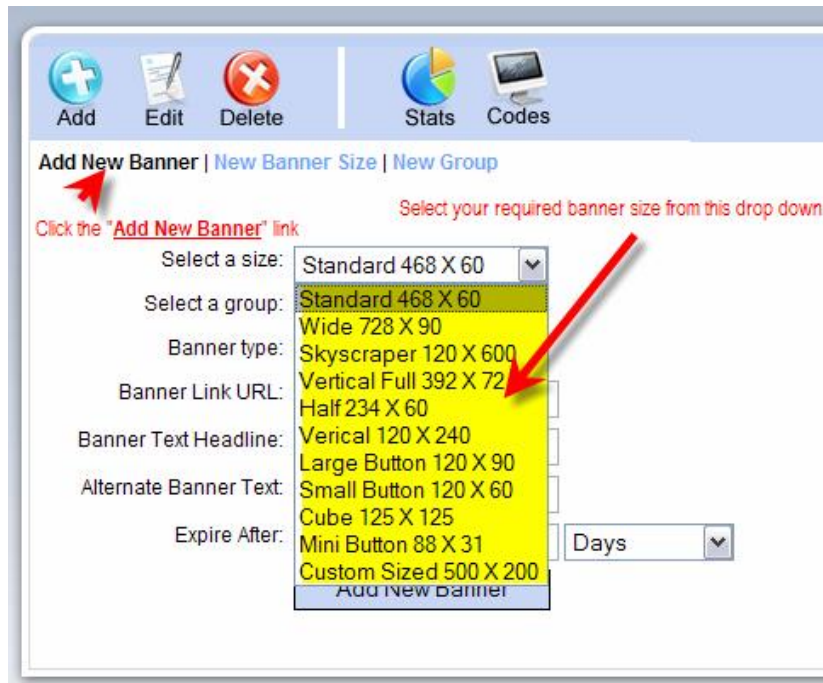

Height: 60 Define the height (in pixels)

Add New Size Click this button to save

Adding A New Banner

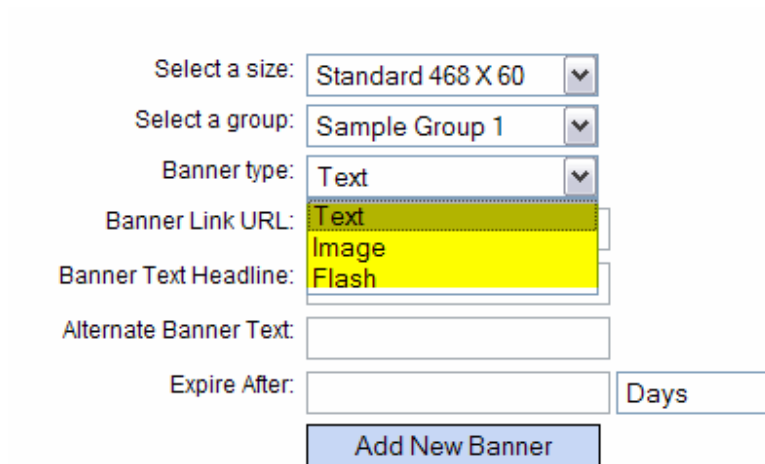

After you have added a new group and/or new banner size, you can now proceed to adding a new banner. To add a new banner, see the image below for info.

1. Select your required banner size:

The screenshot shows the 'Add New Banner' form. At the top, there are icons for Add, Edit, Delete, Stats, and Codes. Below these are tabs for 'Add New Banner', 'New Banner Size', and 'New Group'. A red arrow points to the 'Add New Banner' tab. The form contains several fields: 'Select a size:' (Standard 468 X 60), 'Select a group:' (Standard 468 X 60), 'Banner type:' (Skyscraper 120 X 600), 'Banner Link URL:' (Vertical Full 392 X 72), 'Banner Text Headline:', 'Alternate Banner Text:', and 'Expire After:' (Days). A red arrow points to the 'Banner Link URL' dropdown menu, which is open and shows a list of options: Standard 468 X 60, Wide 728 X 90, Skyscraper 120 X 600, Vertical Full 392 X 72, Half 234 X 60, Vertical 120 X 240, Large Button 120 X 90, Small Button 120 X 60, Cube 125 X 125, Mini Button 88 X 31, and Custom Sized 500 X 200. The 'Add New Banner' button is at the bottom.

2. Then select the type of ad banner you would like to add

The screenshot shows the 'Add New Banner' form. The 'Banner Link URL' dropdown menu is open, showing options: Text, Image, and Flash. The 'Add New Banner' button is at the bottom.

New banner was added

3. Fill up the required fields and just click the "Add New Banner" button to save your new banner.

Getting The Codes

After adding a new banner to a new group, then it's time for you to copy the codes and paste it into any of your web pages.

Note: You do not have to use the script for onsite web pages only, instead you can also use it to manage unlimited number of banners/ads over unlimited (onsite and offsite) websites.

delete | Stats | Codes

which you want the code: Select group banner

Select the group: Select Banner Size

Select refresh rate:

Transparency of banner: Get Code

Then just open your existing or new web pages with your favorite HTML editor and copy and paste the codes into the location where you want the banner to display.

The **refresh rate (in seconds)** allows you to control how often the banner should rotate.

Get Code

Select the banner for which you want the code:

Select the group:

Select refresh rate:

Transparency of banner: Get Code Copy and paste this code into your web page/s

5 banners will be rotated. Paste the generated code into the webpage:

```
<!-- Start Code -->  
<iframe src="http://favdemo.com/adsinboxes/banner.php?<br>action=b&t=true&ref=5&w=468&h=60&grp=12" width="468" height="60"<br>marginwidth="0" marginheight="0" hspace="0" vspace="0" frameborder="0"<br>scrolling="no" allowtransparency="true" background-<br>color="transparent"></iframe><br><!-- End Code -->
```

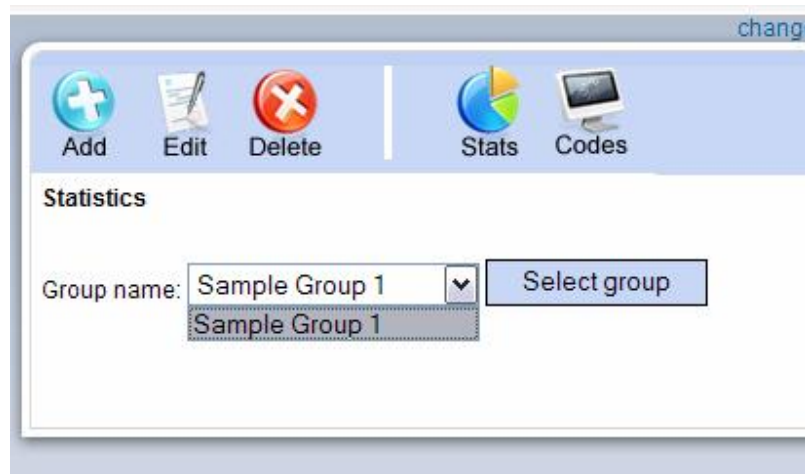

Customizing Your Text Ads

The format of your text ads can be customized by going to the **Edit | Edit Ad Template** Section

Statistics

To view number of impressions and clicks per group, simply click the Stats icon, then select from the list, the group which you would like to view the stats:

That's it!

Most importantly, **always test every feature fully** before you use the product. This should always be carried out, no matter the script you are installing.
