Read Me!

Monochrome helps you to easily convert batches of color images to grayscale. Monochrome gives you control over the conversion methods, the tonal range and image filtering, so you can create a more consistent set of output images. Monochrome also let you present slide shows of your images, either before or after the conversion has been completed.

System Requirements
This software works best with OS X 10.10 (Yosemite)

Installation
1. Double-click the archive file you have downloaded, Monochrome231.zip. Open a Finder window for the Monochrome231 folder.

2. Read the Monochrome License and Monochrome Quick Start Guide.

3. Drag the Monochrome icon to the Applications folder on your disk drive. Double-Click the icon to launch program.

Purchase and Registration
Until purchased and registered, the software will function as a time-limited demo. The expiration date can be found on the Registration Panel.

Once the software expires you will no longer have unlimited access to the software's full functional capabilities. To purchase a license, visit our website at http://www.einsteinslegacy.com and click the "Store" link in the top right corner.

Finding More Information
While using this software , you may open the User Guide by choosing " Monochrome Help" (Cmd-?) from the Help menu.
