

On Premises Output Time Server for Windows

Manage your Business better just by a single click

Output Time Server Installation Steps

Registration Process

1. Signup for Output Time Account in <http://www.outputtime.com/sign-up/>

The registration form consists of several input fields and a submit button. The first field is labeled 'Company'. The second field is labeled 'Sub-Domain' and has '.outputtime.com' pre-filled. The third field is labeled 'Administrator Name' and has a user icon on the left. The fourth field is labeled 'Administrator Email' and has an '@' symbol on the left. The fifth field is labeled 'Administrator Password' and has a lock icon on the left. Below the fields is a line of text: 'By clicking you agree to the [Customer Agreement](#) and [Privacy policy](#).' At the bottom is a large blue button labeled 'Sign Up!'. Below the button is a link: 'Forgot your outputtime url?'.

In online registration screen provide Company Name , Administrator Name, Email and Password.

2. On successful signup, you will receive an email with download details and 60 Days Trail License key. You can download the Zip package and extract the Server files in a folder. Run 'OutputTimeServer.exe' in the folder and start the installation.

Note : Output Time for Windows doesn't install any software on your PC or mess with any of your existing databases or local settings. It runs 100% from the extracted/installed folder.

Prerequisites which also need to be downloaded...

Microsoft Visual C++ 2008 Redistributable Package (x86)

<https://www.microsoft.com/en-in/download/confirmation.aspx?id=29>

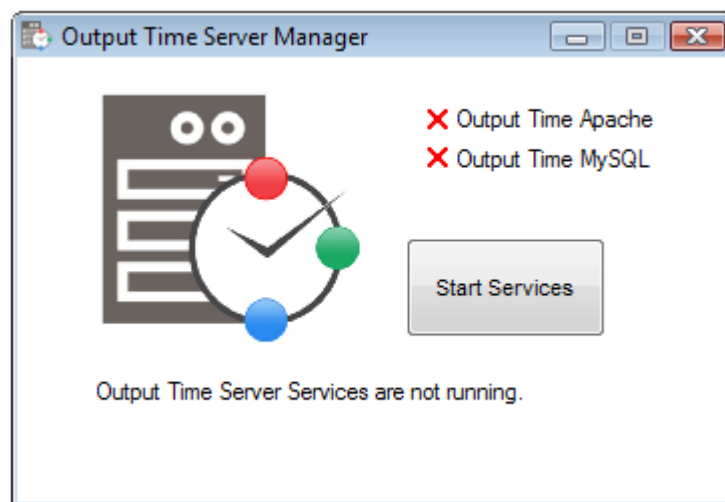

Microsoft Visual C++ 2010 Redistributable Package (x86)

<https://www.microsoft.com/en-in/download/confirmation.aspx?id=5555>

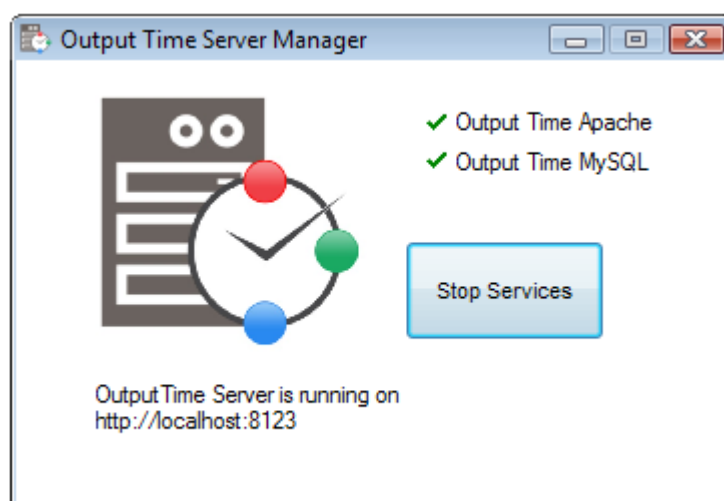

Microsoft Visual C++ 2012 Redistributable Package (x86)

<https://www.microsoft.com/en-in/download/confirmation.aspx?id=30679>

3. Start 'OTServerManager.exe' & you can see the status of Output Time Apache and Output Time MySQL service.

4. Click Start to run Apache/ Mysql instances as windows services.

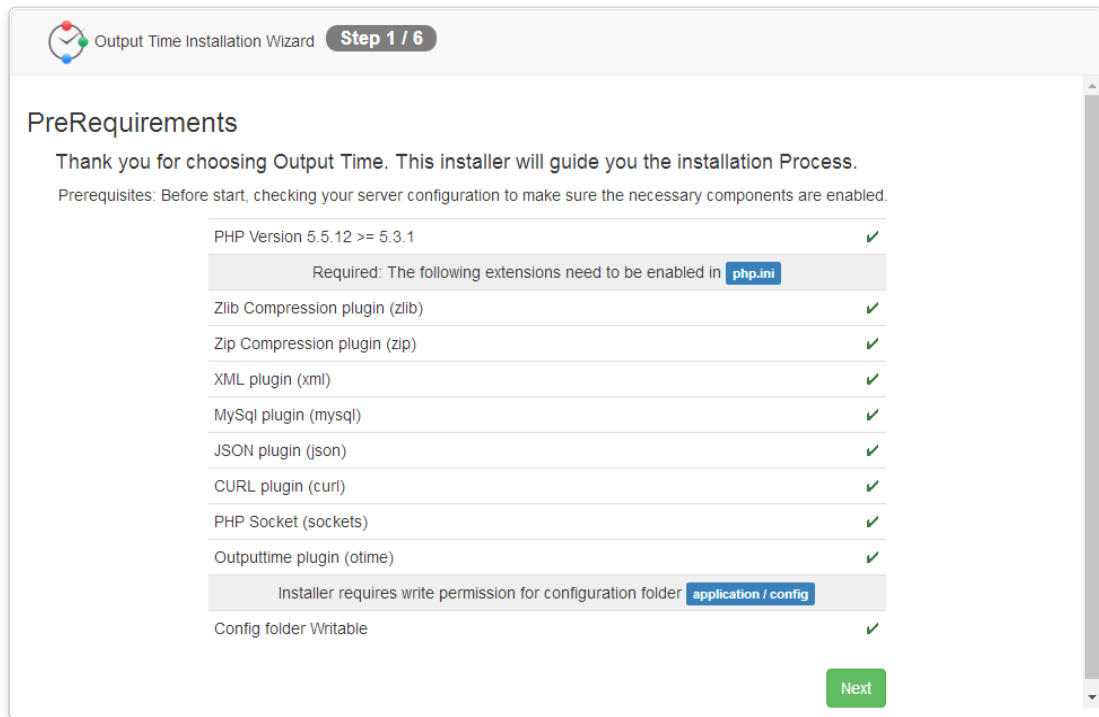

Open <http://localhost:8123/> in your browser. If our server application is running, you should see the Output Time Installation wizard.

Output Time Installation Wizard
